

## LMZ Coin Water Meters

LMZ coin water meters are used for pre-payment of water based consumption LMZ models have built-in water meter and a solenoid valve with stainless steel housing. LMZ token meters are used in sports facilities, camping sites etc.

The prepayment can be set by customer. The water volume and number of coins can be set. After placing of the coin into the slot the display shows the released volume of water. The solenoid valve switches on at the same time. The water volume will be reduced Liter by Liter. The water volume will be increased if additional coins are placed into the slot.

### Features

- Pre-Payment of Water using Tokens
- Profile and standard token versions (currency versions available on request)
- 2-Line LCD display displaying the remaining water volume
